DETAILED ACTION

Allowable Subject Matter

Claims 1-19, 26-28 and 30-36 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented, for example, in the independent claim 1, which include a method of making a prescription optical device having the steps of calculating the surface heights of the arched prescription surface zone in accordance with the predetermined prescription and transforming the surface heights of the arched surface to surface heights of a flat surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2873

Claims 20-25 and 29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 20, it is recited that the lens "... can be curved..." which does not positively recite the limitation such that it **is curved**. If it is not curved, then the other limitations would not apply. (Claims 21-25 depend on claim 20). Claim 29 is confusing, since it first recites "the ophthalmic lens of claim 26..." and then further recites, "...that is made according to smooth prescription ophthalmic lens specifications and not according to claim 26." If any feature is not according to the base claim, then it should be rewritten with the intended features. (Note: claim 29, line 1, "dose" should read -does-).

Response to Arguments

Applicant's arguments with respect to claims 20-25 and 29 have been considered but are moot in view of the new ground(s) of rejection.
